

# KeyCorp – 2023

## CLINICAL PROGRAMS ADMINISTERED BY EXPRESS SCRIPTS

The prescription portion of the KeyCorp Medical Plan participates in a number of clinical programs that are structured to provide you with a progressive program of drug review and approval. This helps both you and the Plan because it allows the Plan to provide you with coverage that is clinically appropriate while allowing the Plan to maintain a predictable cost structure. Present Plan drug utilization programs include reviews for coverage of a drug under the benefit or for certain amounts.

**These drug utilization programs are subject to change throughout the year. Additionally, new drug review and utilization programs may be added throughout the year.**

New programs are always being developed, and existing programs modified. As these programs are developed, the Plan will continue to add new programs and modify its existing programs. If you have questions regarding whether your particular prescription drug is subject to one of the Plan's review programs, please check [express-scripts.com](http://express-scripts.com) throughout the Plan year.

### **Examples of common prescription drugs that fall into the Plan's required review programs.**

When you are prescribed one of the following drugs, the Plan will require that a coverage review be performed to determine whether there is an alternative that should first be prescribed as part of the Plan's program of drug utilization review.

**The following prescription drugs require preapproval by calling Express Scripts at 800.849.9138:**

If as a result of the review your request for coverage is denied, you may always initiate an appeal by calling Express Scripts at **800.849.9138**. You, or your representative, may appeal this decision in writing within 180 days of the receipt of the denial notice. The notice will contain details on where to submit your appeal. If your appeal is denied, you have the right to a final internal appeal.

If the payment, coverage, or service requested continues to be denied, or you do not receive a timely decision, you may be able to request an external review of your claim by an independent third party who will review the denial and issue a final decision. More information about the external review process will be provided by Express Scripts in the denial notice.

Under the Employee Retirement Income Security Act (ERISA) of 1974, as amended, you have a right to receive, upon written request and at no charge, information used to review your request for coverage. Under Section 502(a) of ERISA, you also have the right to bring a civil action if your final appeal is denied.

### Drug Quantity Management

The Drug Quantity Management program ensures that the quantities supplied are consistent with clinical dosing guidelines, to support the safe, effective, and economic use of drugs based upon FDA-recommended guidelines and medical literature. *A prescription that exceeds the recommended dosage or quantity allowed will require a coverage review if additional quantities are necessary. Call Express Scripts at 800.849.9138.*
