

## DRUG QUANTITY MANAGEMENT POLICY – PER DAYS

**POLICY:** Dermatology – Vtama Drug Quantity Management Policy – Per Days

- Vtama® (tapinarof 1% cream – Dermavant)

**REVIEW DATE:** 06/08/2022; selected revision 08/17/2022

---

### OVERVIEW

Vtama, an aryl hydrocarbon receptor agonist, is indicated for the topical treatment of **plaque psoriasis** in adults.<sup>1</sup>

### Dosing

Apply a thin layer of Vtama to the affected area(s) once daily (QD).<sup>1</sup> The pivotal studies enrolled patients with plaque psoriasis, with a body surface area involvement of 3% to 20%.

### Availability

Vtama is available as a 1% cream, supplied in 60 g tubes.<sup>1</sup>

### Application Information

For topical product application, a standard measure, the finger-tip unit (FTU), is often used.<sup>2</sup> One FTU is the amount of product that is squeezed out of a standard tube along an adult's fingertip. One FTU is equivalent to approximately 0.5 g and provides enough product to treat an area of skin that is twice the size of one adult hand, or approximately 2% of an adult's total body surface area (BSA). Therefore, it is assumed that 2 g of a topical agent would provide enough product for one application to approximately 8% of the patient's BSA.

Based on the FTU method, the quantity limits of 60 g per 30 days are estimated to provide enough Vtama to cover approximately 8% of the patient's BSA when applying QD for 1 month (30 days).

### POLICY STATEMENT

This Drug Quantity Management program has been developed to promote the safe, effective, and economic use of Vtama. If the Drug Quantity Management rule is not met for the requested medication at the point of service, coverage will be determined by the Criteria below. All approvals are provided for 1 year in duration.

**Automation:** None.

### Drug Quantity Limits

Product	Strength and Form	Retail Maximum Quantity per 30 Days	Home Delivery Maximum Quantity per 90 days
Vtama® (tapinarof 1% cream)	60 gram tube	1 tube (60 grams)	3 tubes (180 grams)
