# **PRIOR AUTHORIZATION POLICY**

**POLICY:** Oncology – Rydapt Prior Authorization Policy

• Rydapt® (midostaurin capsules – Novartis)

**REVIEW DATE:** 03/06/2024

#### **OVERVIEW**

Rydapt, a tyrosine kinase inhibitor, is indicated in adults for the following uses:<sup>1</sup>

- Acute myeloid leukemia, newly diagnosed, that is FMS-like tyrosine kinase 3 (*FLT3*) mutation-positive as detected by an FDA-approved test, in combination with standard cytarabine and daunorubicin induction and cytarabine consolidation. <u>Limitations of use</u>: Rydapt is not indicated as a single-agent induction therapy for treatment of patients with acute myeloid leukemia.
- Aggressive systemic mastocytosis, systemic mastocytosis with associated hematological neoplasm, or mast cell leukemia.

## **Guidelines**

Rydapt is discussed in the National Comprehensive Cancer Network (NCCN) guidelines:<sup>2</sup>

- **Acute Myeloid Leukemia:** NCCN guidelines (version 1.2024 February 28, 2024) recommend Rydapt + standard dose cytarabine and daunorubicin among the treatment options for induction (category 1) and re-induction, consolidation, and post-induction therapy and for relapsed/refractory disease for patients with *FLT3-ITD/TKD* mutation (category 2A).<sup>3</sup> It was noted that while Rydapt was not FDA-approved for maintenance therapy, the pivotal trial was designed for consolidation and maintenance for a total of 12 months.
- Myeloid/Lymphoid Neoplasms with Eosinophilia and Tyrosine Kinase Gene Fusion: NCCN guidelines (version 1.2024 December 21, 2023) recommend Rydapt for patients with *FGFR1* or *FLT3* rearrangements in chronic phase or blast phase (category 2A).<sup>4</sup> Rydapt is also recommended for treatment in combination with induction chemotherapy followed by allogeneic hematopoietic cell transplantation (if eligible) for lymphoid, myeloid or mixed lineage neoplasms with eosinophilia and *FGFR1* or *FLT3* rearrangements in blast phase (category 2A).
- Systemic Mastocytosis: NCCN guidelines (version 1.2024 December 21, 2023) recommend Rydapt for the treatment of aggressive systemic mastocytosis, systemic mastocytosis with an associated hematologic neoplasm, and mast cell leukemia (all category 2A).<sup>5</sup>

#### POLICY STATEMENT

Prior Authorization is recommended for prescription benefit coverage of Rydapt. All approvals are provided for the duration noted below.

**Automation:** None.

### RECOMMENDED AUTHORIZATION CRITERIA

Coverage of Rydapt is recommended in those who meet one of the following criteria:

### **FDA-Approved Indications**

- 1. Acute Myeloid Leukemia. Approve for 1 year if the patient meets the following (A and B):
  - A) Patient is  $\geq 18$  years of age; AND
  - **B)** Patient has *FLT3* mutation-positive disease as detected by an approved test.
- 2. Aggressive Systemic Mastocytosis. Approve for 1 year if the patient is  $\geq 18$  years of age.
- 3. Mast Cell Leukemia. Approve for 1 year if the patient is  $\geq$  18 years of age.
- **4.** Systemic Mastocytosis Associated with Acute Hematologic Neoplasm. Approve for 1 year if the patient is  $\geq 18$  years of age.

# **Other Uses With Supportive Evidence**

- **5. Myeloid or Lymphoid Neoplasms.** Approve for 1 year if the patient meets the following (A, B, <u>and</u> C):
  - A) Patient is  $\geq 18$  years of age; AND
  - **B)** Patient has eosinophilia; AND
  - **C**) Patient meets one of the following (i <u>or</u> ii):
    - i. Patient has an FGFR1 rearrangement; OR
    - ii. Patient has an *FLT3* rearrangement.

### CONDITIONS NOT RECOMMENDED FOR APPROVAL

Coverage of Rydapt is not recommended in the following situations:

1. Coverage is not recommended for circumstances not listed in the Recommended Authorization Criteria. Criteria will be updated as new published data are available.
