

## PRIOR AUTHORIZATION POLICY

**POLICY:** Ophthalmology – Vascular Endothelial Growth Factor Inhibitors – Susvimo Prior Authorization Policy

- Susvimo™ (ranibizumab intravitreal injection via ocular implant – Genentech/Roche)

**REVIEW DATE:** 11/16/2022

---

### OVERVIEW

Susvimo, a vascular endothelial growth factor (VEGF) inhibitor, is indicated for the treatment of patients with **neovascular (wet) age-related macular degeneration (nAMD)** who have previously responded to at least two intravitreal injections of a VEGF inhibitor.<sup>1</sup>

### Safety

Susvimo has a Boxed Warning regarding endophthalmitis, which occurred at a 3-fold higher rate with Susvimo vs. Lucentis (1.7% vs. 0.5% in active-controlled trials).<sup>1</sup> Additional Warnings associated with the implant and/or implant-related procedures unique to Susvimo include rhegmatogenous retinal detachment, implant dislocation, vitreous hemorrhage, conjunctival erosion or retraction, conjunctival bleb, postoperative decrease in visual acuity, air bubbles causing improper filling of the implant, and deflection of the implant.

### POLICY STATEMENT

Due to the safety concerns, **approval is not recommended** for Susvimo. There are significant risks of use based on the Boxed Warning regarding endophthalmitis.

**Automation:** None.

### RECOMMENDED AUTHORIZATION CRITERIA

None.

### CONDITIONS NOT RECOMMENDED FOR APPROVAL

Coverage of Susvimo is not recommended in the following situations:

- 1. Neovascular (Wet) Age-Related Macular Degeneration.** Due to the safety data, approval is not recommended for Susvimo. In the pivotal trial, Susvimo demonstrated non-inferiority compared with Lucentis.<sup>1-3</sup> However, ocular adverse events were more frequent with Susvimo vs. Lucentis; patients treated with Susvimo require regular monitoring to evaluate for presence of these adverse events. Notably, Susvimo labeling includes a unique Boxed Warning regarding endophthalmitis, which was three times more frequent with Susvimo vs. Lucentis.
- 2.** Coverage is not recommended for circumstances not listed in the Recommended Authorization Criteria. Criteria will be updated as new published data are available.
